**Control Your Conduct.**  
The worst kind of unhappiness, as well as the greatest amount of it, comes from our conduct to each other. If our conduct, therefore, were under the control of kindness, it would be nearly the opposite of what it is, and so the state of the world would be almost reversed. We are for the most part unhappy because the world is an unkind world. But the world is only unkind for the lack of kindness in the individuals who compose it.—Friedrich William Faber.

**GermProof Money.**  
To a bank in Spokane, Wash., belongs the distinction of circulating the first antiseptic germ-proof national bank notes. The United States treasury is still experimenting with devices to launder dirty bank notes to bright, crisp ones, but the Spokane bank has the first sanitary money on record. Fifty thousand dollars in bills, put out by the bank, were signed with an ink said to consist largely of carbolic acid. The result is the bills are saturated with an agency which means death to the most vigorous germ who'd live there.

## "Deep Stuff" Is What Doughboys Read Over There

Paris.—(By Mail.)—Not "best sellers" but serious works is the literary refreshment demanded by the American soldiers in France, now that the war is over, and our boys are waiting to get back home. The soldier is a serious-minded person, with decided intellectual views, all reports to the contrary. He wants to make his way in the world.

The American Y. M. C. A. in France came to this conclusion when a group of 300 doughboys, when asked what they would like as light reading matter, spoke up with one voice, and demanded books on applied Mathematics. They were so much in earnest about it that the Y. M. C. A. decided to start its first class in practical arts in France. B. H. Morrison, formerly an instructor in the States Teachers' College of Greeley, Colorado, was sent for to take charge of the class.

The first real impediment to intellectual research among the buck privates presented itself when it was discovered that there wasn't so far as any could find out, an American book on applied mathematics in all France. There were the French ones, of course, but none should be expected to study French and Mathematics simultaneously. It really isn't well to mix drinks from the fort of learning in that way. Mr. Morrison, however, was undaunted by the absence of textbooks and volunteered to teach without them until the ones which were wired for immediately could arrive from the good old U. S. A.

## "Y" To Use Candy To Fight Alcohol "Over There"

**Association Men Will Fight Demon Rum With Proper Method—The Sweet Tooth Compete Against Wine Shop**

Paris.—(By Mail.)—A sugar-coated American Expeditionary Force is the ideal now being striven for in the mark-time period of the armistice and demobilization, with fighting gone and the American fighting men suddenly turned into a uniformed tourist-seeing France. Peace, as has been quoted often, has victories, and one of them is to be the victory over the evil influences which besiege an idle army. In this campaign the Y. M. C. A. has planned the drive and the soldiers are executing it. Incidentally, the Y. M. C. A. has gone into competition with the wine-shop, as this story will relate.

During the period of demobilization, the Y. M. C. A. will have an even greater responsibility than it has had while the war was on. The soldiers then had the inspiration of being in the fight—or backing up the fighters—to spur them on. They also were extremely busy and their time for recreation and for spending money was limited. But there has been a let-down since the armistice was signed, and the men in olive drab are waiting for transportation home.

Idleness always means trouble and

the government has no idea of dumping hundreds of thousands of men back into the United States after they have had nothing to do but loaf for months. To do this would be to create a very unhealthy social and industrial condition in our own country. There are drills and discipline and, for many, the work of helping to put France on her feet again. At the same time, the men have more leisure and more chances to buy things than they had before.

One of the most important things the Y. M. C. A. expects to do during the demobilization period is to enter into active competition with the French wine shops. No, the Red Triangle is not going into the saloon business. It is planning to fight alcohol with sugar. According to medical experts, this is the best kind of ammunition to use in a battle against the more or less well-known Demon.

Heavy drinkers don't care for sugar and heavy consumers of sweets usually pass up the "booze." So by plying the soldiers with candy, chocolate, chewing gum and cookies, the Y. M. C. A. expects to reduce the consumption of alcohol very materially.

### Whetstone in Tree Trunk.

Whit's sawing down a large poplar tree on the Weimar farm two sons of Joseph Weimar found their saw would not penetrate. They began a little higher, and after the tree was down they discovered a whetstone in the heart of the trunk. It is supposed that many years ago, when the tree was a sapling, lumbermen working in the fields laid the stone there and forgot to take it away, and the tree grew around it.—Marietta (Pa.) Correspondence, Philadelphia Record.

### Ancient Thessalonika.

British soldiers out at Salonika have little love to spare for the place. "They say out there," remarked a Welsh warrior home on leave, "that it dropped out of God's pocket." Yet 18 centuries ago it had a Christian church so important that St. Paul devoted to it two of his immortal epistles.

### To Mend Broken China.

Tie the broken parts of china together with stout string, being sure that the edges meet evenly; then completely submerge the dish in a pan of skim milk and place on back of stove to gently simmer all day. Do not remove from the milk until thoroughly cold and even then don't cut the string for 24 hours. Hot water will not cause the cups to come apart again.

### Fifty Dollars for Newfoundland.

Henry VII was so pleased with the discoverer of Newfoundland, the first colony added to the crown, that he presented him with a \$50 note. Mr. E. Hall of the Navy league alluded to this circumstance at a meeting of the Society of Engineers at Burlington House. The first effort to colonize for the British empire, he said, was made in 1500.

### No Experience.

A kindergarten teacher was telling the children in her department about sparrows; concerning their ways and habits. Among other things she said: "The sparrows eat up the worms. Now children, which would you rather have, worms or sparrows?" "I've never had sparrows," piped up a tiny boy near the front.

### Decimating.

Originally, decimation was a military punishment of the Romans, who dealt with large bodies of rebels, prisoners or mutinous soldiers by executing one man in ten. In popular use today, decimation means the destruction of a large proportion of anything; as, "the epidemic has decimated the population," or "the Prussian guards were decimated at Verdun."

### New Vegetable Butter.

Shea butter, the reddish oil of the West African shea tree (*Butyrospermum Parkii*), is one of several vegetable butters that are now of unusual interest to makers of margarine, chocolate, candles and soap. The sweet and wholesome pulp of the nut is much prized by the natives, and is said to be nearly two-thirds butter. Great Britain controls the source of supply.

### Cops Stand the Strain.

A well-known scientist informs us that closing the eyes and relaxing the muscles for a space of five minutes several times a day helps one to stand the strain of war-time conditions. And here we have been blaming the cops when they were doing a wise and excellent thing, especially when they were wanted by belated citizens, who were holding a hurried session with stick-up men.—New York Times.

### A Bit Twisted.

A squad of recruits was practicing communications down a line of men in open order formation. One message was: "Hard pressed on left; send reinforcements at once." To the amazement of the officer in charge this is how it reached him: "Hard up on left; send three dollars and four cents at once."—Buffalo Commercial.
